

# OUTDOOR *living*

Pergolas ■ Canopies ■ Auvents

*Creativity in progress*

**A**LUMINCO, headquartered in Inofyta Viotias, was the first company in this sector which, since its establishment, launched the production of items made of cast aluminium in traditional designs.

After 31 years of experience in the aluminium sector, the company has evolved into a vertically integrated aluminium industry.

Its production facilities include integrated processing, powder coating, assembly, finishing, packaging and storage units for the products it produces and delivers.

ALUMINCO offers a wide range of aluminium products and systems, architectural and construction solutions, which include:

- A full range of tilt & turn as well as sliding, cold and thermal break aluminium systems, as well as curtain wall
- A variety of designs on aluminium panels for any architectural or construction requirement, with an emphasis on style, functionality and safety
- Safety doors and reinforced doors for main entrances suitable for private or commercial buildings. Available in traditional or modern designs, in a large variety of patterns and colors
- Railing systems for balconies, patios and stairs. In traditional and modern designs, made of cast aluminium, aluminium or inox type profiles and glass railing systems

- Outdoor systems, such as Pergolas, shading systems, canopies, gates, fences and lighting posts, offering integrated solutions for the construction of high demand buildings

ALUMINCO exports its products to over 60 countries globally and is always at the forefront of innovative development of products and systems satisfying the most demanding clients.

The powder coating process is certified by QUALICOAT and SEASIDE CLASS (seaside class processing) specifications. Furthermore, ALUMINCO also conforms to the ISO 9001 certified by TUV Austria, for quality management system and the ISO 14001 environmental management system.

All aluminium and railing systems are designed, developed and tested by our Research & Development department and are then certified by established institutes and international organizations, such as the IFT Rosenheim in Germany, the Istituto Giordano in Italy, the EKANAL (Greek Center of Aluminium Development) in Greece.

**A**LUMINCO, siégeant à Inofyta Viotias (40km d' Athènes et 70km de l' aéroport international Eleftherios Venizelos) fut la première société en Grèce qui a lancé la fabrication de produits en aluminium en fond d' alu au design classique.

Avec son expérience de plus de 31 ans, la société a évolué dans une industrie d' aluminium verticale grâce aux investissements et développement de sa capacité de production.

ALUMINCO offre une vaste gamme de produits et systèmes en aluminium, en satisfaisant de demande les plus exigeantes, tels que:

- Une gamme complète de Systèmes de menuiserie, ouvrant à la française, coulissant, coulissant à lever, mur rideau, en rupture thermique ainsi qu' en série froide.
- Une gamme variée de panneaux en aluminium, compatible avec tout les systèmes de menuiserie, au style contemporain ou classique
- Des portes d' entrée, portes de sécurité, adaptable aux bâtiments privé ou même de commerciaux, grâce au grand choix de modèles

- Une gamme de systèmes de garde corps, le plus complet du marché.
- Nos systèmes d' ombrage, Pergolas, marquises, clôtures et portails et éclairage ne laissent pas aucune espace qui n' est pas «habillé» par ALUMINCO.

Les produits ALUMINCO sont diffusés dans plus de 60 pays à travers le monde! Guidés par nos clients et par la demande du marché, nous nous efforçons de satisfaire les demandes les plus exigeantes, aussi bien en qualité que en fonctionnalité.

Notre plant de laquage électrostatique, et procédure de laquage sont bien certifiés par QUALICOAT et selon spécifications de SEASIDE CLASS.

Le respect d' ALUMINCO pour l' environnement est bien prouvé par ISO 14001, et ISO 9001 (norme internationale) émis par l' organisme TUV d' Autriche (gestion / management de la qualité).

Pour suivre les tendances architecturales fortes, ALUMINCO et son équipe, commence par la conception, le design et finissent par la mise en œuvre de l' ensemble de produits et systèmes.

# Pergolas Canopies Auvents

ALUMINCO pergolas and canopies are awesome additions to any open space or private areas, whether residential or commercial property.

Entirely made of aluminium and easy to install, they ensure quality and protection without compromising on comfort and style.

With exceptional design and a wide range of colors they transform all dull areas into beautiful outdoor environments, offering fully-customized solutions as well.

Les pergolas et les auvents ALUMINCO ont des ajouts géniaux à tout espace ouvert ou privé, qu'ils soient commerciaux ou résidentiels.

Entièrement en aluminium et faciles à installer, ils garantissent la qualité et la protection sans compromettre le confort et le style.

Avec un design exceptionnel et une large gamme de couleurs, ils transforment toutes les zones ennuyeuses en beaux environnements extérieurs, offrant également des solutions entièrement personnalisées.

## 10 Classic Traditional

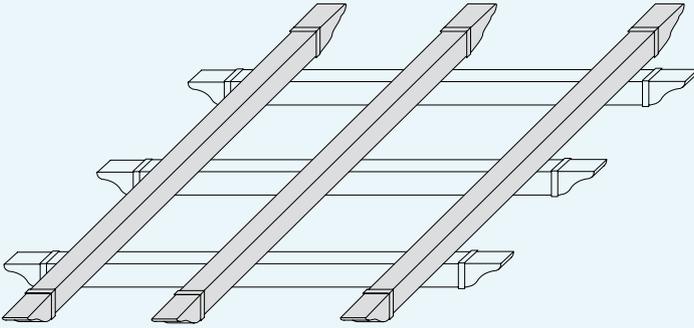

Traditional pergolas are resistant to all weather conditions, easy to assemble and maintenance free. Powder coating finishes are available in many colors of seaside class quality and in several wood imitation shades.

La pergola traditionnelle peut être posée sur tout type de bâtiment, donnant un aspect classique. Elle résiste aux conditions atmosphériques facilement assemblée et installée, et ne nécessitant aucun entretien particulier. Grâce à la peinture électrostatique, une haute protection contre la salinité est atteinte. La pergola traditionnelle d'ALUMINCO est disponible en tous les coloris RAL et teintes bois.

Designed in an identical line with that of classic wood pergolas.

Dessinée en ligne identique à celle de la pergola classique en bois.

Classic - Classique

Designed in an identical line with that of classic wood pergolas.  
Dessinée en ligne identique à celle de la pérgola classique en bois.

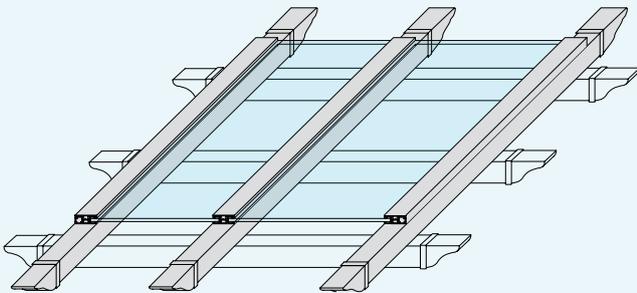

# Classic Traditional

## With polycarbonate sheets

Traditional pergolas may be combined with polycarbonate panels that offer additional protection from various weather conditions. They offer style and comfort to any outdoor living area, guaranteed by Lexan® polycarbonate sheets, which are exclusively represented in Greece by ALUMINCO.

## Avec panneaux en polycarbonate

Des panneaux en polycarbonate peuvent se fixer sur la pergola traditionnelle, ce qui accentue la protection contre les conditions atmosphériques. ALUMINCO, est le distributeur officiel de Lexan® en Grèce.

### Traditional - With canvas roofing

The combination of traditional pergola with canvas roofing offers additional protection and shading, lending simultaneously the sense of noble, particularly when combined with wood imitation shades. This solution is ideal for applications intended for traditional summerhouses, giving the charm of country style.

### Pergola traditionnelle en toile

L'usage de toile accentue la protection solaire. Sa combinaison avec des teintes bois donne un résultat d'esthétique exceptionnel. Solution idéale pour de maisons de campagne et des maisons de style traditionnel offrant le charme requis par la tradition.

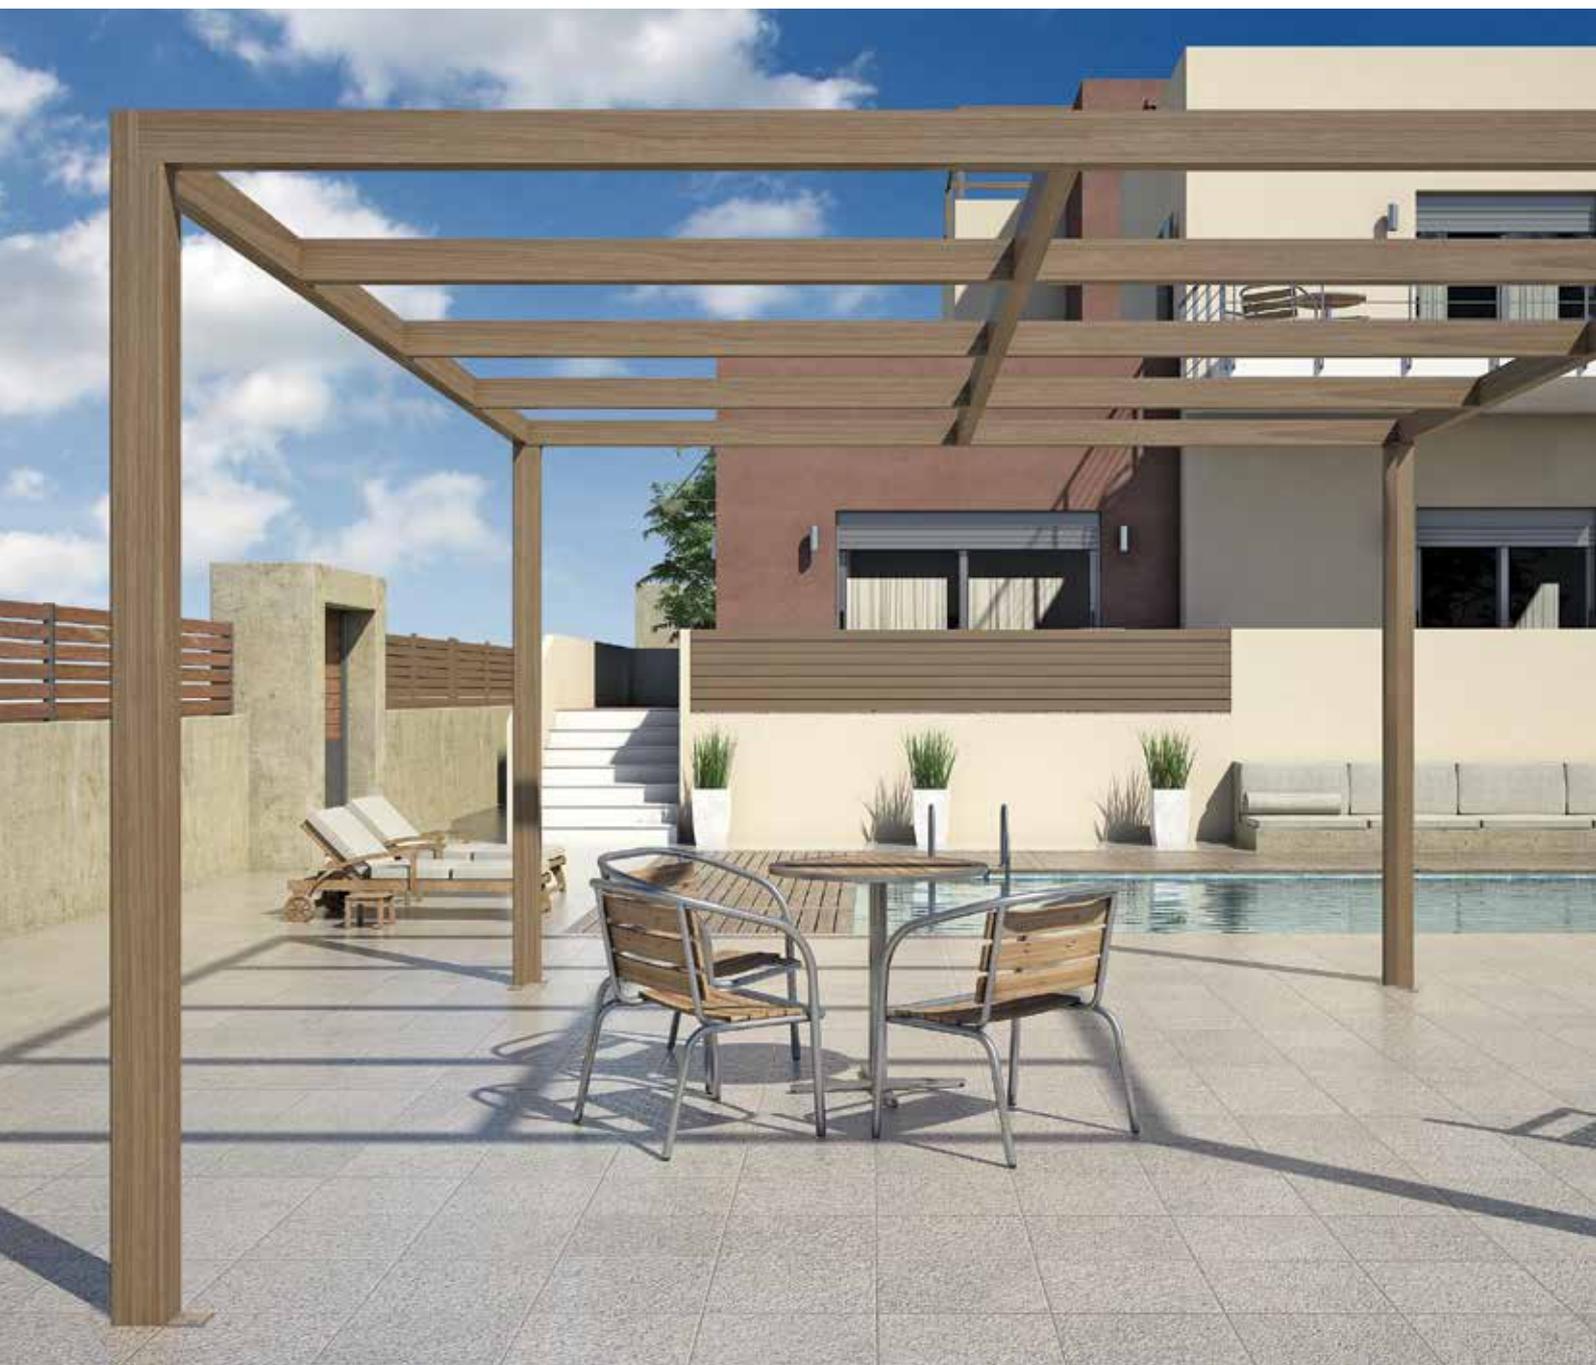

Classic - With canvas roofing  
Classique - En toile

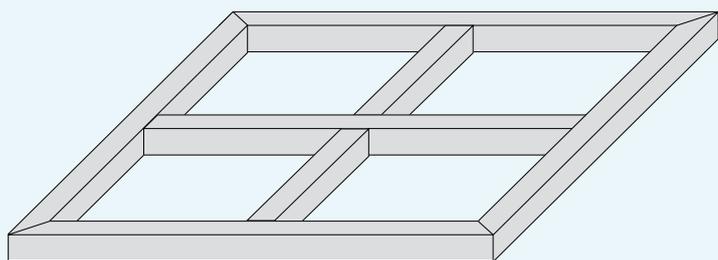

## 14 Modern

A modern version of aluminium pergolas in simple and minimal line, suitable for buildings with the concept "less is more". Available in several colors, with seaside class powder coating and indisputable high construction quality. It is the ideal architectural solution for modern houses.

Une proposition moderne pour les pergolas en aluminium en lignes simples et distinctes s'adaptant aux bâtiments de hautes demandes et spécifications architecturales. Disponible en une grande variété de couleurs (peinture électrostatif «Seaside Class»). Il s'agit de la solution idéale pour des maisons d'architecture contemporaine.

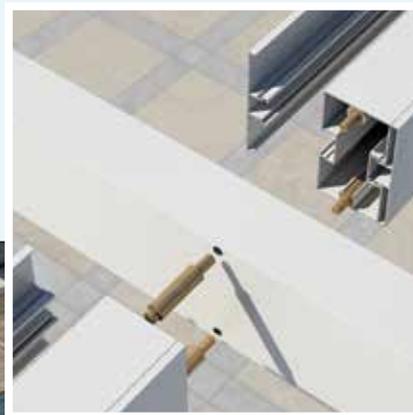

Modern - Moderne

Easy and fast construction. Special joints for the installation of transversal purlins on crossbars without further processing or joints.

Facile et rapide façon de construction. Connecteurs spéciaux pour l' installation de pannes transverses sur les barres sans autre traitement ou assemblage.

The frame is firstly set and then the square joints are made inside the total construction.  
Le cadre est fixé d' abord et après les joints carrés sont créés dans la construction.

# 16 Modern

## With polycarbonate sheets

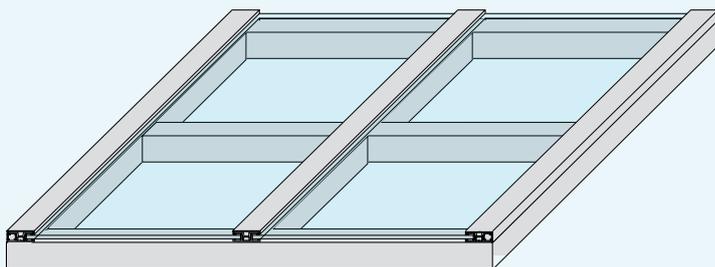

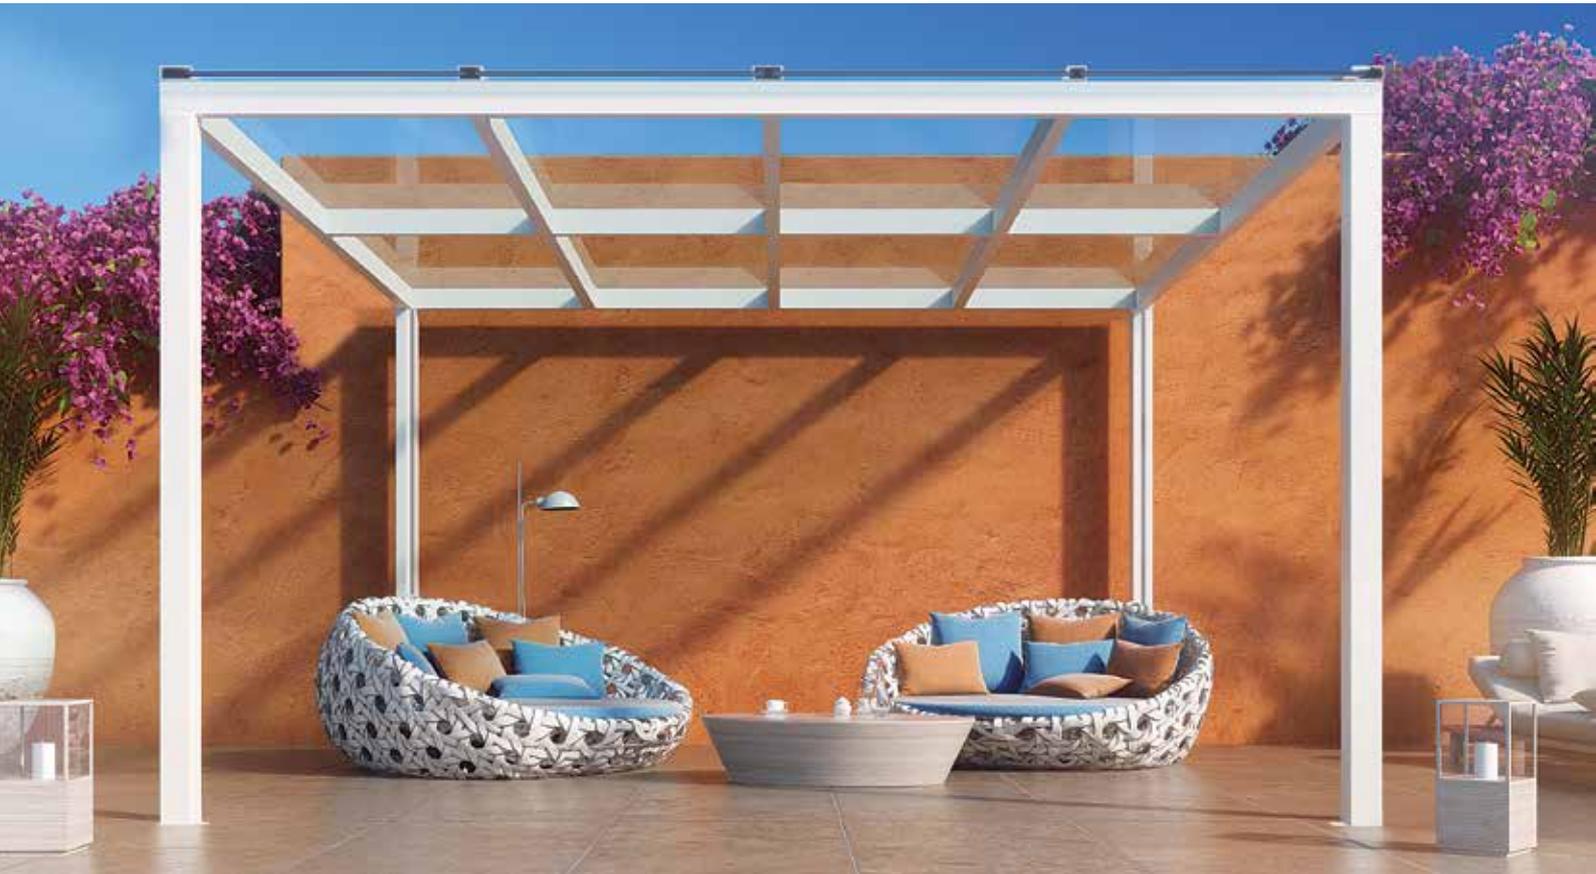

Polycarbonate panels may be fitted on modern pergolas, adding protection from weather conditions. Ideal for gardens, swimming pools, roof gardens, etc. adding style and particular aesthetics. Lexan® polycarbonate sheets officially distributed in Greece by ALUMINCO, make safe and impermeable pergolas.

## Moderne avec panneaux en polycarbonate

La pergola moderne peut également accepter des panneaux en polycarbonate favorisant la protection contre les conditions atmosphériques.

Application idéale en jardins, en piscines, en terrasses etc. L' utilisation des panneaux en polycarbonate Lexan® favorise l' étanchéité.

(ALUMINCO est le distributeur officiel de Lexan® en Grèce)

Moderne - Avec panneaux en polycarbonate

Modern kiosk-style weatherproof pergola with polycarbonate sheet.

Pergola moderne avec panneaux en polycarbonate - l' étanchéité et l' esthétique contemporaine.

The use of woven canvas offers shading and a modern or traditional result, depending on the desirable style.

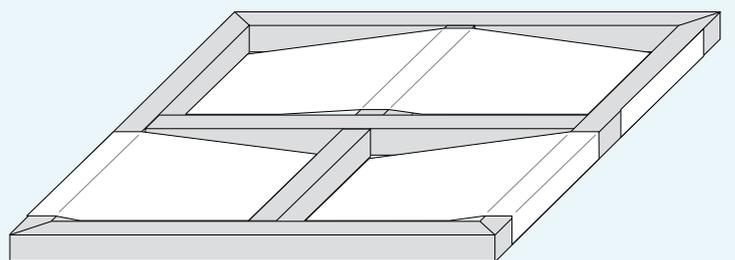

L'emploi de toile tricoté accentue l'ombrage d'ombrage avec un effet moderne ou traditionnel, selon le style que vous désirez.

### With canvas roofing

Another version of pergola, featuring a soft line of canvas on the fixed aluminium structure. The combination of modern pergolas with canvas offer additional shading to balconies, gardens etc.

### Moderne pergola en toile

L'usage de toile sur la pergola moderne favorise l'ombre en jardins, balcons ou en espaces professionnels.

Modern - With canvas roofing  
Moderne - En toile

## 18 Modern

### With movable louver blades

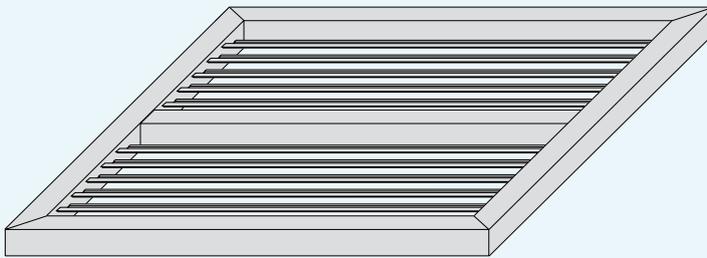

The technological evolution in shading systems!

An exceptional modern design construction characterized by top functionality and high aesthetic value. The pergola can be motorized, providing the optimum angle for best sun-shading. It can be easily and accurately handled through a remote control.

### Avec stores vénitiens mouvants

L' évolution technologique dans les systèmes d' ombrage!  
Une solution efficace et esthétique.

L' inclinaison du profilé d' auvent est ajustée mécaniquement. C' est une structure qui rêforme esthétiquement l' architecture du bâtiment.

Modern - With movable louver blades  
Moderne - avec stores vénitiens mouvants

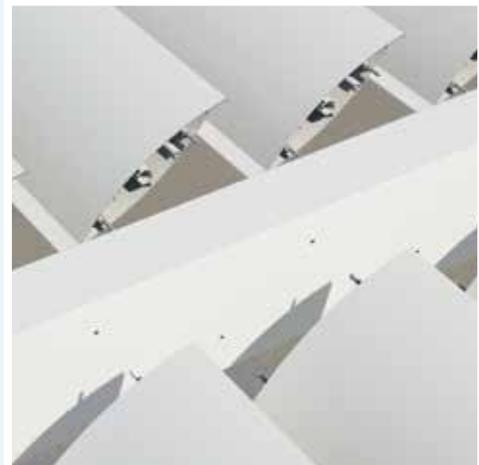

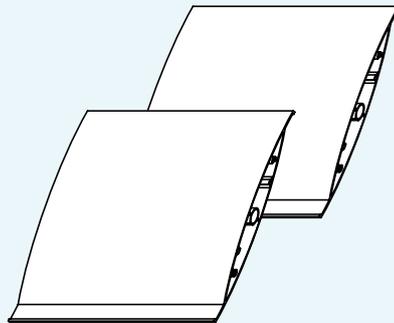

**With fixed louver blades**

Class meets quality. One more option of the modern pergola, where fixed louver blades may be used in certain parts, giving originality to modern design. Highly recommended for those seeking things out of the ordinary.

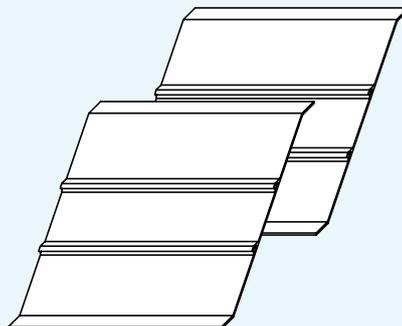

**Avec stores vénitiens fixés**

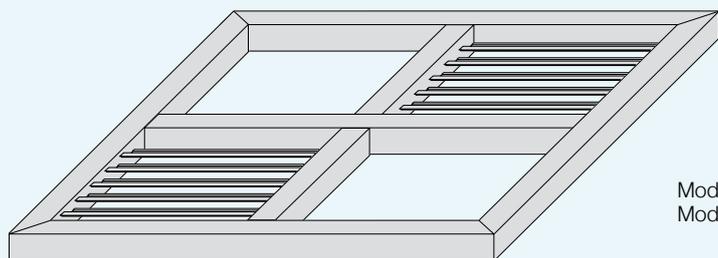

L'élégance rencontre la qualité. Une autre option pour la pergola moderne où les stores vénitiens peuvent être utilisés en certaines parties de la structure, créant des combinaisons originales. Elle est la solution parfaite d'architecture pour une conception nouvelle et avancée.

Optional oval louver blades.  
Option de store vénitien ovale.

Optional straight louver blades.  
Option de store vénitien droite.

Modern - With fixed louver blades  
Moderne - Avec stores vénitiens fixés

## Entrance Canopies

Entrance canopies are an ideal solution for the protection of main entrances and professional spaces from rain and sun. They are made of pure aluminium, powder coated, in traditional and modern designs. They are available with solid polycarbonate Lexan® sheets. They are easily installed without intervening in the building's architecture, available in four beautiful designs, providing an excellent aesthetic and functional result.

Available in standard dimensions (100, 120, 140, 180 and 220cm - depth 100cm depending on the design and thickness of the construction).

## Auvents pour les portes d'entrée

Ces auvents sont la solution idéale pour protéger les portes d'entrée des maisons et des bâtiments de société de la pluie et le soleil. Ils sont fabriqués en aluminium et sont disponibles en dessins traditionnels et modernes et de panneaux en polycarbonate Lexan®. Ils sont fixés facilement sans interférer sur l'architecture du bâtiment. Quatre dessins offrent un excellent effet esthétique et fonctionnel.

Disponible en panneaux de 100, 120, 140, 180 et 220cm et épaisseur 100cm.

970-F10

970-F16

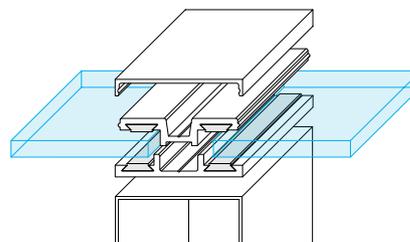

970-F20

## Polycarbonate sheet support Support des panneaux en polycarbonate

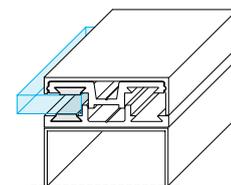

Support of polycarbonate sheet.  
Support des panneaux en polycarbonate.

1 Main transom.  
Panne centrale.

2 Transom finishing.  
Finissage de la panne.

## Moments of Inertia / Drag Moments

In order to calculate the loads that pergolas may accept, please consult the moments of inertia given in the following table. X, Y axes of Moment of Inertia and Resistance of Inertia, are respective to the given position of the profiles at pages 34/36/43, that is to say X=Horizontal Axis, Y=Vertical Axis

## Force d' Inertia / Coefficients de Resistance

Pour calculer les charges qui peuvent accepter les pergolas, s' il vous plaît consulter les moments d' inertie dans le tableau ci-dessous. Axes X, Y, pour Inertia Torques & Resistors ont été pris en compte de la même façon que les profils respectifs aux pages 34/36/43 sont délimités, c'est-à-dire X=axe horizontal, Y=axe vertical

CODE	DESCRIPTION	INERTIA		RESISTANCE	
		IXX cm <sup>4</sup>	IYY cm <sup>4</sup>	WX cm <sup>3</sup>	WY cm <sup>3</sup>
